2010-2014 Camaro Switch Panel Installation Instructions

1. When you unbox the switch panel it should have all switches installed into the switch panel and ready for installation in the vehicle.

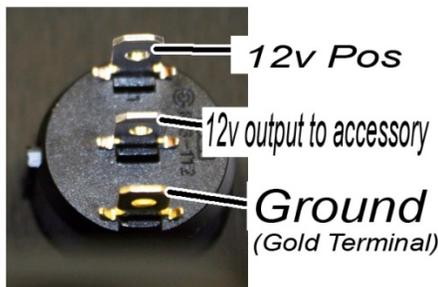

2. To wire the switches follow these diagrams:

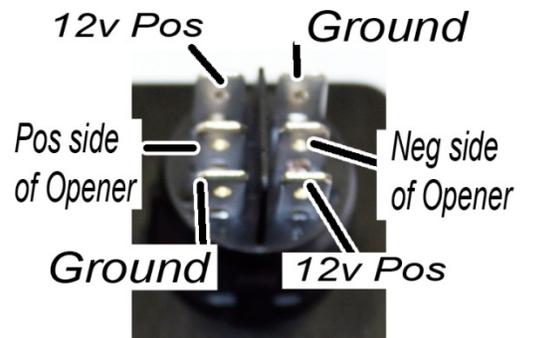

Momentary Switch Wiring

On/Off Switch Wiring

Bottle Opener Switch Wiring

For the installation of the switch panel into the vehicle you will need to open up the center console and remove the factory rubber lining.

Once the lining is removed place the switch panel in place and mark the mounting hole locations.

Using a 3/16" drill bit, drill small holes for the mounting clips to hold the switch panel in place, then place the switch panel in place using the mounting tape and the small clips to hold the panel in place and re install the rubber liner in the bottom of the console.

Switch panel is now installed and ready for use.
